

# Le-Sapay School Center

Plan-les-Ouates (GE)  
2014

## Architects

CLR architectes SA

## Project completion

2011 – 2014

## Scaffolding type

Lightweight 200 kg/m<sup>2</sup>

## Representative

Plan-les-Ouates / Lancy

## Surface area involved

8'400 m<sup>2</sup>

Located in the park of a neighborhood under construction, the Le-Sapay School Center is a school with 24 classes around a vast esplanade, and with a variety of uses: a restaurant, hall, gym rooms, swimming pool, underground passageways, etc.

Aside from the scale of the project, the difficulty of the project stemmed from a set schedule (due to the school year restarting) as well as very tight phases allocated for the various participants in the project.

Lightweight scaffolding (200 kg/m<sup>2</sup>) including 30 cm safety brackets, had to be set up twice: the first time for the structural work and a second time for the installation of the prefabricated elements. In addition, huge platforms were installed above the swimming pool and for the technical aspects of the gym.
